Earlier registration times are given for students with accommodations, student-athletes, active military members, and ROTC members. After taking these factors into account, registration times are calculated based on credits completed, not including credits in progress. An undergraduate student must have successfully completed 24 semester credits to be classified as a sophomore; 56 semester credits to be classified as a junior; and 88 semester credits to be classified as a senior. Instructions for viewing the registration start time, adding courses to a study plan, and registering are available online. For students with a hold on their account, resolving the hold will allow them to view the registration start time.
