

## TELEVISION-RADIO

This one's for you if your interests are in video and audio editing, producing, and directing. You'll get everything here from studio production to documentary making.

Students in this major work in first-rate, state-of-the-art digital video and audio lab settings. In addition to the main teleproduction studio and digital video lab, a second studio will open in Sept. '04 to support a 24-hour student weather channel that will be operated in conjunction with the Department of Geography-Meteorology.

Majors will develop creative and technical skills in all aspects of teleproduction and radio, including videography, on-air delivery, and field production.

### **You'll study . . .**
