

## IMAP/POP SETTINGS

GroupWise is our officially supported email and calendar solution. We encourage faculty, students and staff to use these tools. If you would like to use other clients you may not be able to take advantage of the full feature set of GroupWise.

To configure a different email application for use with GroupWise via IMAP or POP3 use the following settings: POP3 Server name: gwdm4.valpo.edu Port: 995 Use secure connection (SSL): Yes Username: your login id IMAP Server name: gwdm4.valpo.edu Port: 993 Use secure connection (SSL): Yes Username: your login id Outgoing (SMTP) server settings Server name: gwdm4.valpo.edu Port: 587 Use secure connection (TLS): Yes (For Apple's Mail application, this is marked as "SSL") Requires authentication: Yes Username: your login id *(Please note that our SSL certificates are currently not being recognized by some mail applications as valid. A workaround is to accept the certificate when prompted.)*
