

- Our MBA students are now being trained on the world's leading provider of business software, SAP. SAP is an ERP software application used by 95 % of the Fortune 1000 corporations. ERP systems improve operational efficiency and productivity of business processes.
- Many of our on-campus courses can now also be attended via the web from any location world-wide. MBA courses utilize a software that allows students to log in online and view a live, web-broadcasted class session as it is happening. Students can interact with the classroom through speakers and microphones, work with students through shared screens, and view all presentation materials and videos online as well. The courses are also recorded and stored for students to view at a later time if necessary.
- We have laptops available for in-class student use.
- The entire College of Business building is equipped with wireless internet.
- Many research resources from the University's library are available on-line and accessible to students at any time and from any computer.
- Our classrooms are equipped with projectors, a large viewing screen, televisions, speakers, power sources and internet access at all seats.
