

The Department of Mathematics & Computer Science is very proud of the accomplishments of their alumni as teachers, scholars, and business people. These accomplishments seem to begin almost immediately after graduation. To view the [companies](#), [graduate schools](#), and [teaching positions](#) where our recent graduates have begun their post-baccalaureate careers, click on the appropriate link.

Even more so, we are very pleased to learn about how the Valpo experiences of our alumni have shaped their lives, both personally and professionally. To share what is happening in your life with us, click on the [Alumni Registration](#) link to send your information electronically. You can also send us letters and pictures in hard copy form. The blackboard in the department lunch room (the same one for the past 40 years) often holds many announcements that alumni have shared with us; engagements, weddings, pictures of children, etc.

Past editions can be viewed through the [past newsletters](#) link. Distributed each fall, our chatty newsletters attempt to keep you up to date on who's who in the department, information about the interests of current students, the scholarly activities of the faculty, and our outreach efforts to the community.

The [Alumni Association](#) link will take you to the University's Alumni Association's homepage.

Have a good day!
