

[A Program in English for Undergraduates](#)

Hungary has a long tradition of excellence in mathematics education. The program *Budapest Semesters in Mathematics* provides a unique opportunity for North American undergraduates. Through this program, mathematics and computer science majors in their junior/senior years may spend one or two semesters in Budapest and study under the tutelage of eminent Hungarian scholar-teachers. Most instructors have had teaching experience in North America and are familiar with the cultural differences.

- All courses are taught in English.
- Classes are held in small groups.
- Credits are transferable to North American colleges and universities.
- The school is near the center of historic Budapest.
- Living costs are modest.
