

The applied statistics minor is an interdisciplinary program designed to provide students the fundamental skills necessary to do statistical analysis. The impact of statistics profoundly affects society today through its applications in science, politics, and business.

The 15 credit minor is accessible to students with many different majors and consists of the following curriculum:

MATH 140, MATH 240, IDS 205, or PSYCH 201 (3 credits) MATH 340, IDS 340,
or ECON 325 (3 credits) MATH 344
(3 credits) MATH 493 (3 credits) CS 325
or IDS 320 (3 credits)
