

## COURSES IN PHYSICS AND ASTRONOMY

Most of the online components of courses in our department are located on the Blackboard site (<https://blackboard.valpo.edu>). Check there for your course materials.

On the left, you will find a link to any courses that have material posted to this server.

You will also find a link to a page that lists all the help sessions offered in the various introductory classes. If you are in need of help, please contact your professor and/or attend these help sessions as a first step. You can also contact the Academic Success Center (phone: 464-5985).
