

OUR FACILITIES

The Theatre Department facilities are located in the Center for the Arts, which was dedicated in September 1995. The spaces of the VUCA were designed as teaching spaces. In every case, the interests of students learning to do and make theatre were given highest priority. Every support space, including scene shop, costume shop, control booth, and dressing rooms, serve as studios for teaching of theatrical techniques. The Theatre Department is committed to teaching students using the most advanced technology. In addition, theatre faculty offices are located in the building insuring close working relationships between faculty and students.
