Adding a Test Student

Instructors have often asked to see exactly what their students see when logged into their course. The Add Test Student tool will allow any instructor to add a test student account. The instructor can then use the user name provided and a password of their choosing to view the course exactly as a student.

In the Course Tools section of the Control Panel, you’ll find the tool, “Add Test Student” at the top.

Your regular user name followed by underscore s (_s) will indicate which is your student login. You’ll set the password and then click submit.

Next, just use that user name with the _s and the new password you set to login to your course as a student.

Returning to the same Add Test Student tool in Course Tools will allow you to un-enroll the test student account or reset the password for the account.
