

# MATTHEW BUDDELL

*Electrical Engineering Major  
Fundamentals of Business Minor*

*After graduation:  
I plan to enter the workforce  
as an Electrical Engineer*

## Valpo Experience

*During the Robotic Football Playoff Championship Game, we were down around 10 points. In a miraculous moment, our quarterback completes the first retained catch of the tournament and the entire gym freezes for a half second. Our receiver rushed down the field for a touchdown, which resulted in us gaining the lead, as there are additional points for passing. We had worked endlessly on trying to get passing to work, both in practice and in design, and to have it completely change the momentum and result in a championship was one of the most elating moments in my Valpo Career.*

## Honors and Awards

*Member of Tau Beta Pi (Engineering Honors Society)  
Corresponding Secretary of Eta Kappa Nu (Electrical Engineering Honors Society)  
Member of the Order of the Engineer  
Two time Brian Hederman Trophy winner as a member of Robotic Football team.*

## Internship

*Corporate Intern in Telematics at Caterpillar Inc.*

## Extracurricular Activities

*Crusader Pep Band (Student Director)  
Valpo Robotics (Robotic Football Coach and Co-Project Manager)  
IEEE Student Chapter (Secretary)*
