

**Kevin Geiman: Field Ecology Courses**  
**Awarded \$268**

I am requesting funds from CELT to support ongoing training in ecology and naturalist studies in the Morton Arboretum Naturalist Certificate Program as a way of enhancing teaching and learning in Phil 230: Environmental Philosophy and Ethics. Specifically I am asking CELT to underwrite a year's worth of courses (1/2 of the program) to be taken between January and December 2006. My plan is to take the four-course Field Ecology sequence, the Illinois Fauna-Spring course, one Local Flora course, and one of the other elective courses as it fits my schedule.
