

Double the Speed of Learning

4-Steps to Make Learning Stick

February 11, 2020

Harre Union Ballroom

8:30 a.m. - 2:45 p.m. (CST)

LeAnn Nickelsen
Keynote Speaker

LeAnn Nickelsen, M.Ed., brings powerful, evidence-based strategies that combine formative assessment and educational neuroscience to maximize student learning. Nickelsen created a four-step instructional cycle that educators from all disciplines may easily implement- (1) chunk, (2) chew, (3) check, and (4) change. The cycle examines effective instructional strategies to bump it up or break it down according to student needs and has the power to boost student achievement with lasting results. Teachers will receive an amazing packet with many free resources in this powerful training. Along with plentiful tools designed to help transform students into active learners and independent thinkers, attendees will also receive templates compatible with any subject area.

LeAnn is a national expert at closing learning gaps in struggling students, especially in high poverty and special education populations. She's a former teacher of the year, a Jensen-certified, brain-research trainer for over 20 years and has authored over 14 practical books. LeAnn is an expert coach helping teachers incorporate best practices into their daily lesson plans and within their classrooms.

LEARNING OBJECTIVES. Grades 4–12

Participants will

- ✓ Learn how to plan instruction and pre-assess efficiently so daily learning targets and formative assessments enable each student to meet standards.
- ✓ Understand how the components of chunk, chew, check, and change work with the adolescent brain in the formative assessment process.
- ✓ Examine effective teaching strategies so you can bump it up or break it down according to students needs.
- ✓ Understand the importance of the on-going, purposeful aggregate of environment, instruction and curriculum strategies that makes it all work.

Foreword by Rick Wormeli
