You have indicated that you (will) have a sibling enrolled in school during the 2019-2020 academic year who is classified as an independent student for FAFSA purposes. Typically, this is someone in graduate school or who is over the age of 23. We understand that many times parents still provide support to these students. We will use this worksheet to determine if your parents provide more than 50% of the independent student's support and therefore should be included on your FAFSA.
